Abstract (en)

[origin: US5443599A] A process comprising the reduction of textile dyestuffs in an aqueous alkaline medium by means of a reducing compound which is a complex of an organic complexing agent and an iron (II)-salt. The iron (II)-salt is present in an amount sufficient to ensure the desired reduction of the dyestuff after a single oxidation.

Abstract (fr)

Selon un procédé de réduction de colorants textiles dans un milieu alcalin aqueux au moyen d'un complexe contenant un sel de fer, on utilise une quantité telle de sel ferreux qu'il suffit de l'oxyder une seule fois pour obtenir la réduction voulue du colorant.
