Abstract (en)

[origin: EP0513422A1] The invention relates to a bilaterally usable fireproof support for roof tiles during drying and firing in kilns. According to the invention, the support is designed as a U-shaped cassette, the inner surface of which, which is enclosed by the two legs of the cassette, serves as a support for greatly profiled roof tiles, and the opposite outer surface of which, turned by 180 DEG , serves as a support for flat plane roof tiles.
