Abstract (en)

[origin: EP0513708A1] A method for forming element-free space sections (9) in a slide fastener chain (1) is provided that coupling elements (2) can be efficiently removed by a small force without damaging fastener tapes (8). The method for forming element-free space sections (9) in the slide fastener chain (1) comprises the steps of, cutting heads (3) of interengaged discrete coupling elements (2) of space sections (9) at one leg of forked legs of the individual coupling element (2), pushing up the heads (3) of the coupling elements (2) in the direction orthogonal to the fastener tape faces from the cutting side, and gripping the remaining cut legs (4, 5) by grippers (23) to be drawn-out and removed in the direction orthogonal to the fastener tape faces. <IMAGE>
