Abstract (en)

[origin: EP0514300A2] The invention relates to a method and to a device for paving with tiles. It will be used in the building field. The device of the invention comprises : - means (5) for storing independent tiles in which there is provided at least one batch (2) of tiles (1) which are prepositioned with respect to each other and define an elementary paving surface, - means (6) for maintaining the positioning of the tiles (1) in relation to each other, - means (7) for grasping and laying the said batch (2) of tiles (1) enabling the prepositioned tiles to be picked up simultaneously and laid simultaneously onto the surface (15) while controlling the abscissa and ordinate of each elementary surface. <IMAGE>f
