Abstract (en)  
[origin: EP0514576A1] To protect a fatty substance which is sensitive to oxidation or a food or cosmetic product containing a fatty substance which is sensitive to oxidation, an antioxidant mixture is incorporated therein which consists of a vitamin B complex and an organic acid, especially niacinamide ascorbate, and a lecithin rich in phosphatidylcholine. The mixture makes it possible in particular to render vitamin C in fat-soluble form.
