Abstract (en)

[origin: EP0515269A1] Snap-action electric switch and switching unit formed of several compartments. It comprises a control key (3) actuating a plate (5) in three parts (8, 9, 10) one of which carries at least one moving contact (14), and it is characterised in that at least the part (8, 10), on which a finger (31) of an actuation lever (30') is bearing, comprises means (19, 20) able, when cooperating with the said finger (31), to effect a displacement in one plane of the said plate (5) before rocking. Application in particular to motor car electrical circuit control. <IMAGE>
