Abstract (en)
[origin: EP0515819A2] Transport and/or storage container which has a rectangular or square base with rounded corners - having an inner container, which is shaped by blow moulding from plastic, and having an outer container, which has an outer container casing and an outer container bottom. The outer container casing comprises circumferential and vertical round steel bars which are welded to one another. The vertical round steel bars are connected by their lower and upper ends to an end frame of round steel which is welded onto the outside of the container casing. The outer container bottom is designed as a sheet steel pallet having an upper sheet steel plate, which upper sheet steel plate has cross-sectionally lying U-shaped bent portions which embrace the lower end frame from outside. - A method of production is also specified. <IMAGE>
