Abstract (en)
[origin: EP0516104A2] It is an object of the present invention to provide an apparatus for printing a desired mark on the surface of a sanitary earthenware product. The apparatus is combined with a working robot so as to automate and ensure the work of printing a mark and to print a mark at a constant position. The apparatus comprises a seal holding portion 3 for holding by suction the rear side of a mount 6 of a printing seal 5 having a mark portion 7 separated by heating and provided on the surface thereof, and a driving portion 2 for forwardly and backwardly moving the seal holding portion 3, the seal holding portion 3 being provided with a heater 8 for heating the mark portion 7 of the printing seal 5 held by suction from the rear side of the mount 6. <IMAGE>
