Abstract (en)
[origin: WO9112791A1] The description relates to a feeding bottle with a bottle body (1) having a microporous air inlet device in its bottom region (2), permitting air to enter from outside but preventing the liquid contents of the bottle from leaking out, formed by micropores (5) made directly in the bottom (2) of the bottle body (1) and formed in one piece with the rest of said bottle body (1).
