Abstract (en)
[origin: EP0516926A1] The invention relates to packaging of a pump (9), with two shells (1,2) made of heat- and/or sound-insulating material which surround the pump (9) and which, in the assembled and connected state of the pump, form a layer insulating the pump (9), the shells (1,2) having, on their inner faces, recesses (3) which are shaped in accordance with the exterior of the pump, and one of the shells having a further recess (4) whose shape matches the exterior of the pump and into which the pump (9) can be inserted in a position which is rotated through 90 degrees in relation to the position in which the pump (9) is positioned in the shells (1,2) in the first position. <IMAGE>
