Abstract (en)

[origin: EP0517289A1] A device for removably mounting a plinth (14) on the base wall (22) of a furniture item (23) comprises a means for its stable fixing to the plinth (14) and an elastically yieldable element acting between said fixing means and said base wall (22). According to the invention, the elastically yieldable element consists of a plunger (12) extending from said fixing means and terminating with a thrust surface arranged to act against said base wall. <IMAGE>
