Abstract (en)

The combined tooling jig and work table apparatus in which a work table portion (12) and a sole plate portion (40) are mounted between two parallel elongate support members (10). The apparatus may be mounted on a suitable support, such as a work bench (69), so that the sole plate portion at least is cantilevered out from the support and is adapted to mount a power tool (60), the cutter (61) of which passes up through an aperture (45) in the sole plate. <IMAGE>
