Abstract (en)
[origin: EP0517619A1] Terminal block comprising two support parts (2), each of which includes a plurality of support bases (4) and a plurality of strips (3), each of which is fixed respectively to a base (4) of each support part (2). According to the invention, each base (4) includes, in the region of its upper part, a first locking element and each strip includes, in the region of its lower part, a second locking element, the said first and second locking elements cooperating in order to form a positive locking by means of a snap-fastening mechanism. <IMAGE>
