Abstract (en)
[origin: EP0518179A2] The invention relates to an electrical switch (10, 11), especially for motor vehicles, having a housing (12), having at least one contact point (14) which is constructed from in each case one stationary and one moving contact piece (16, 18), and having a control part (20, 21) for operating the moving contact piece (16), the control part (20, 21) being constructed as a rocker which is spring-loaded back, and the pivoting axis (22) of the rocker (20, 21) being arranged at one end of the rocker, and the end of the rocker opposite the pivoting axis (22) engaging with the housing (12) and being capable of movement from a first limit position into a second limit position, and vice versa. <IMAGE>
