Abstract (en)
A rudder for watercraft which comprises two rudder blades (3) with opposite hydrofoil configurations (103) which are arranged at the aft region (4) of the hull, spaced apart transversely thereto and symmetrically with respect to the centerline of the watercraft and which are movable in both senses in the vertical direction, alternately from a contemporaneous raised unoperative position to an immersed operative position, wherein the respectively immersed blade (3) causes the turn or shift of course of the watercraft to the corresponding direction, and vice versa. <IMAGE>
