Abstract (en)
[origin: EP0518233A1] The road marking (20) has a number of basic bodies (21) which are coupled to one another in the longitudinal direction one behind another by means of coupling devices. For each basic body (21), at least one reflector bow (23) is present, which is aligned transversely to the longitudinal extent of the basic body (21) and is detachably connected to the basic body (21) by means of a connection device. The reflector bows (23) have on both their end sides a number of reflectors (49) which are permanently connected to the reflector bow. <IMAGE>
