Abstract (en)

[origin: JPH05182747A] PURPOSE: To provide an electric resistance heating apparatus by using optimized resistance components made of carbon or carbon composite material at low production cost. CONSTITUTION: This electric resistance heating apparatus includes resistance components made of carbon or carbon composite material, which are interconnected via connecting members 12, 16, 18. The resistance components comprise multiple band materials 10, which are electrically and mechanically interconnected by said connecting members 12, 16, 18.
