Abstract (en)

The subject of the present invention is a device for fixing and aligning signalling equipment mounted on crash barriers in which the items of equipment (4) are mounted on supports (3) which are fixed to the said crash barriers (1), characterised in that the said item of equipment (4) is mounted on the said support via latching means (31l/31m) making it possible to install the said items of equipment (4) in a vertical position and to align them. The invention applies in the field of road and motorway equipment. <IMAGE>
