Abstract (en)  
[origin: WO9113970A1] An improved soap cake (10) designed to eliminate soap wastage by the end user, by having in one of its major surfaces a recess (11) shaped and dimensioned so as to be able to receive therein an implant (12) of a smaller worn or used soap cake, said recess (11) being provided with means (17, 18) for assisting the retention of the implant therein, whereby the implant (12), when so received, becomes integrated with the host cake (10). The implant cake can thus be consumed entirely.
