Abstract (en)

[origin: EP0519366A1] The set of elements consists of at least one box blank (1) having a rectangular bottom part (5) and two symmetrically adjoining side wall parts (13, 14) which are separated by a folding line (8, 9). In order that the loose sheets can easily be inserted and removed, provision is made for a glued tab (10, 11), which is separated by a folding line (6, 7), to adjoin the ends of the bottom part (5) in each case, at least one of which glued tabs having a lower height than the side wall parts (13, 14). Tabs (15), which are separated by folding lines (16, 17), adjoin at least one of the two ends of the side wall parts (13, 14). In the state folded towards the box, the glued tabs (10, 11) bear against said tabs (15) from the outside, their mutually facing sides being spaced away from one another by at least half the width of the bottom part. <IMAGE>
