Abstract (en)

A rotary press cutter assembly comprising a generally cylindrical support (10), a flexible cutting die (12) having a cutting profile (24) thereon, means (24) for detachably securing at least a leading edge (16) of the die (12) on a radially outer surface of the support (10), magnetic strips (14) set in the surface of the support (10) to attract the die (12), and vacuum ports (26) provided in the surface for sucking cut out portions of material onto the die (12). <IMAGE>
