Abstract (en)

[origin: WO9113696A1] A device for storing and possibly transporting workpieces (5) comprises at least one tubular container (1) with a place for receiving a workpiece which can be introduced into the container (1) through a charging opening. The device of the invention is characterized in that one end face of the tubular container (1) (tube) has an inlet opening to which a fluid outlet connection (7, 8, 9) of a surface treatment device for surface treatment of the workpiece with a treatment fluid can be connected and the other end face has an outlet opening (3) for the fluid to which a fluid discharge line can be mounted.
