Abstract (en)

[origin: JPH05187201A] PURPOSE: To provide a rotor in which axial difference and asymmetrical deformation of a first groove fitted with a blade reduce to the corresponding quantity of a second blade groove. CONSTITUTION: A circumferential spare groove 0 that is not provided with blades is located upstream of a first blade groove 1 arranged for a first blade row. And the spare groove is fitted with axially split closing segments 24.
