Abstract (en)

[origin: EP0520591A1] The invention relates to a conveyor with a supporting rail with running faces for driven carrying wheels of vehicles, such as suspended or elevated crabs or the like, with supplementary rail, assigned to the supporting rail, for the supplementary wheels which load the carrying wheels. <??>In order to simplify such a system with a large number of vehicles and few ascending and descending gradients, it is proposed according to the invention that the supplementary rail (6) is supported directly or indirectly on the supporting rail (1) via springs (7). <IMAGE>
