Abstract (en)

[origin: EP0520855A1] The installation comprises the same number of powder reservoirs (22) as there are different-colour powders, a disconnectable and movable linkage unit (18) fitted with devices for sucking this powder, which are connected to specific sprayers (11) and an air-blowing station (56) comprising air-ejection orifices (58) arranged in order to be connected to the said suction devices and thus to clean, by blowing, the conduits along which the powder travels, the linkage unit (18) and the sprayers (11) before bringing the linkage unit (18) against a new different-colour powder reservoir (22). <IMAGE>
