Abstract (en)
The panel comprises a rigid board (1) for support via its front face, a plurality (2) of sheets of paper having a surface area substantially equal to that of the rigid board (1), means (3) for fastening the sheets to the board along one edge of the latter. Moreover, a flap is articulated around one of the edges (10, 11) of the board (1) and is equipped with means (3) for holding it in a first position of covering the sheets (2) of paper and in a second position, on the rear-face (1a) side of the board (1), in order to form, with the board (1), a base for supporting the panel in its substantially vertical position of use. <IMAGE>
