Abstract (en)

[origin: EP0520896A1] The device makes it possible to disable a click (11) for driving a programming cam unit (2), a specified number of times with each rotation by one revolution of a reverser cam (3). The device comprises a plurality of disabling levers (30) arranged on a partition (120) of the reverser cam (3) and cooperating with fingers (350) arranged on a partition (130) of the cam unit (2). The invention applies in particular to the programmers for dishwashers or washing machines. <IMAGE>
