Abstract (en)

The present invention relates to an automatic car park for vehicles. An automatic car park for vehicles (27) according to the invention comprises at least one first carriage (1) and a plurality of parking cells arranged on at least one level, and the said car park comprises at least one second carriage (4) which comprises means (281) for pushing the vehicles (27) so as to enable the vehicles (27) to be loaded onto the said first carriage (1) and to enable the vehicles (27) to be unloaded from the said first carriage (1), and the second carriage (4) preferably comprises, at each of its longitudinal ends, retractable stopping means (281) which can interact with the vehicle (27). The technical field of the invention is that of the construction of devices for handling and storing vehicles. <IMAGE>
