Abstract (en)

[origin: EP0520939A1] The apparatus comprises a storage container (1) and an application device with sleeve (9) and application element (11) which is laterally covered in the position of rest by the sleeve (9). <??>By means of a relative movement of the sleeve (9) with respect to the storage container (1) the application element (11) is exposed, a lock (20) destroyed, the closure (5) of the container opened and the apparatus moved into the ready-for-use state. <??>The apparatus is particularly suitable for the storage and application of small amounts of moisture-sensitive liquids, e.g. primers for adhesive bonds for repair purposes. <IMAGE>
