Abstract (en)

[origin: EP0521293A1] The invention relates to a shaver head, especially the razor blade unit of a wet razor, which is arranged on the front end of a handle and in which a single or double razor blade (6) is resiliently arranged in a plastic casing (1). In order to produce a shaver head, especially a razor blade unit of a wet razor, with improved spring mounting of the single or double razor blades, it is proposed according to the invention to attach the single or double razor blade (6) to a blade block (5) which is mounted so as to be displaceable in the plastic casing (1) against the resistance of a spring towards the rear wall (11) of the said plastic casing (1). <IMAGE>
