Abstract (en)

This consists of a hood made up of a guide structure held to an upper part; wall, ceiling or upper anchorage point; that contains a pipe in the shape of a concertina that can get longer or shorter in accordance with possible movement along the aforementioned guides, with the concertina shaped pipe being joined to the lower part of the mobile hood, and to the fixed part connected to the absorption device. For application in the manufacture of fume extractor hoods. <IMAGE>
