Abstract (en)

[origin: EP0522289A1] Actuator for a rotatably or linearly movable component, where a first double-acting linear drive can be coupled to the component via a controllable coupling, and a control device is provided which controls the forward and return stroke of the linear motor and in one stroke direction of the linear drive activates the coupling for the purpose of the driving connection between linear drive and component and in the opposite stroke direction releases the coupling. <IMAGE>
