Abstract (en)

The present invention regards a chair with a seat and back rest having a correlated and synchronized adjustable inclination in which the seat (11) and the back rest (12) are assembled on parallel oscillating axis (13, 15). The back rest (12) has a lever arm (12a) on its lower part which extends forwards, underneath the seat; the seat rests against said lever arm and oscillates on its rotation axis when the back rest is strained to oscillate on its rotation axis. <IMAGE>
