Abstract (en)
[origin: EP0523448A2] In a coated paper guide roller for a web-fed rotary printing press, having a cylindrical base body (2) and a shell (3) intimately joined to the base body (2) and with a rough, ink-repelling surface, the shell (3) has a first layer (4) surrounding the surface of the base body (2) and consisting of an ultrahigh-molecular base material, which layer is surrounded by a second layer (5) of preferably the same base material as a carrier substance for a single layer of glass beads mixed in. <IMAGE>
