Abstract (en)

[origin: EP0523691A2] The present invention provides a ceramic adjusting shim (4) capable of minimizing the abrasion of parts contacting the adjusting shim, for example, a cam (2) and a tappet or valve lifter (3). The ceramic adjusting shim is produced from a ceramic material and has a surface roughness of not more than 2.0  $\mu\text{m}$  in ten-point average roughness (Rz). <IMAGE>
