Abstract (en)  
[origin: WO9116234A1] The invention concerns processes for luring torpedoes approaching a ship (10). It consists in equipping a known decoy (1) with an explosive charge (6) and a sonar (7) for the detection of the torpedo as it passes (3) in the vicinity of the decoy. The charge is exploded when the torpedo is at the nearest point, the explosion causing the destruction of the torpedo. The invention combines the task of decoying with that of destroying.
