Abstract (en)
[origin: EP0525486A2] The socket for a two-pin halogen lamp (10) having a base (13) which is constructed of insulating material comprises a contact plate (19) for transferring current to the lamp pins (17), in this case the contact plate (19), on which a spring (20) acts, loads the lamp pins (17) and holds them pressed against a stop surface (26), in this case the contact plate (19) when it is in the inserted position lies obliquely with respect to the bearing surface (26) so that an insertion ramp for the lamp pins is produced. <IMAGE>
