Abstract (en)
[origin: EP0526022A2] A corner packing member comprising two arms which are joined together by means of a hinge formed integrally therewith, one of the arms of the packing member being provided with at least one flexible tang adjacent the line of the hinge and the other of the arms of the packing member having at least one complementary cut-out formed therein adjacent the line of the hinge, whereby, in use, when the arms of the corner member are bent around the hinge line, the cut-out is forced past the flexible tang in order to retain the two arms at an angle of substantially 90 DEG . <IMAGE>
