Abstract (en)
[origin: EP0526324A1] The invention relates to a cable clamp of the type including a clamping strip (14) capable of clipping onto a base (12) defining with the latter a calibrated opening (15). According to the invention, the clamping strip (14) forms one part which, independent of the base (12), is detachable, with respect to the latter, and it is adapted so as to be attached to this base (12) in either of two separate positions to which there correspond different passage cross-sections for the calibrated opening (15). Application to electrical appliances, in particular to power plugs, extension pieces and multi-socket units. <IMAGE>
