Abstract (en)

[origin: EP0526400A1] The present invention relates to a process for fixation of reactive dyestuffs on cellulose-containing textile material and equipment for carrying out this process. <??>The process according to the invention is characterised in that the dried fibre material printed with reactive dyes is moistened with water and surrounded by a water-impermeable material and fixed by the action of heat. The fixing process according to the invention can advantageously be carried out using small amounts of urea, preferably without urea, with good print quality.
