Abstract (en)
The invention relates to a dissolver apparatus of the type constituted by a mixing tub (1) and by at least two feeding devices of the solute and of the solvent and also by a recycling device (2) of the solution (7); inside the mixing tub mixing means are arranged into which are conveyed the solvent and the solute; the said mixing means (3) is constituted by a multiple basket (9) into which a series of first nozzles (5) and second nozzles (6) are inserted, which feed the solvent into the multiple basket (9); the said multiple basket (9) is constituted by a series of vertical baffles (10) positioned concentrically with the aim of forming, internally to the basket (9), a labyrinthine course. <IMAGE>
