Abstract (en)

A shoulder strap consisting of a simple or wadded band (1) having a connector element (22,24) on either end (14,16) which may rapidly be connected and disconnected to other complementary element for interengagement with belts (64) or cables (3) of different kinds , e.g. Fig. 4 (6, 7,) , in order to realize different types of shoulder carriers which permit to hold objects hookings them to whichever carrier belts (64) or cables (3) joined to the shoulder strap. Joining with fixed or removable junctions two shoulder straps to one or more cross-pieces , one has the possibility of realizing different ways of transportation on both shoulders, so as to leave one's hands free. <IMAGE>
