Abstract (en)

[origin: EP0526829A1] The folding laundry stand with supports (12) for drying knitwear, which comprises two legs (1, 2) and hanging lattices (3, 4) which form a wide-open V relative to one another in the open position of the stand, is characterised in that there are fixed to the outer ends (10, 11) of the lattices (3, 4) the ends of a support (12) for drying knitwear, said support being tensioned between said ends (10, 11) in the open position of the stand. As a result of this measure, a support (12) for drying knitwear, which has larger dimensions than that known in the art, is obtained, and moreover the part of the stand under the hanging lattices (3, 4) is kept free, so that the entire space available can be utilised. <IMAGE>
