Abstract (en)
[origin: WO9117497A1] An object based computer system has the facility to allow multiple viewers to view and manipulate a semantic object concurrently. The semantic object has a table of viewers which are viewing it and all such viewers are sent update messages to allow them to indicate the set of viewers which is concurrently viewing the object.

Abstract (fr)
Un système informatique orienté objets peut permettre à des structures de visualisation multiples de visualiser et de manipuler simultanément un objet sémantique. Cet objet sémantique possède une table des structures de visualisation qui le visualisent et celles-ci reçoivent des messages de mise à jour pour leur permettre d'indiquer l'ensemble de structures de visualisation qui visualisent l'objet simultanément.
