Abstract (en)
The invention relates to an acoustically insulating panel made of wood with ribs (2, 4) on the upper side and the underside of the acoustically insulating panel, which ribs run at an angle to one another of greater than 0 DEG and smaller than or equal to 90 DEG , and having through-holes (12) between the ribs (2, 4) of the two sides of the acoustically insulating panel, and to a method of producing an acoustically insulating panel.
