Abstract (en)

[origin: EP0528119A1] The invention relates to a fixing element to fix insulating elements (1), having a pressure plate (2), a plug (3) and an expanding element (4) which can be introduced through the pressure plate (2) into the plug (3). In order to be able to anchor the insulating elements reliably using a small number of fixing elements with a high degree of assembly safety, provision is made for the pressure plate (2) to be constructed as a substantially planar, flat plate with a small substantially constant thickness, to have a large area and to be made of a high-strength material.
