Abstract (en)  
An article of ornamentation which as a button, piece of jewelry, container closure, belt buckle, knob for an item of cabinetry, or the like. The article has snap-type action securing elements formed respectively on bases and caps so that a number of different ornamentation caps can be disposed for co-action with a single base to fabricate a number of different ornamentation assemblies permanently attached to one another. In one embodiment the rib (50) is carried by a wall of the cap (42) for co-action with a groove (24) formed in the base (12). In another embodiment the rib is carried by a wall of the base for co-action with a groove disposed peripherally about the cap. In other embodiments a disc-like intermediate cap is disposed between a base and a top cap. In yet another embodiment the cap includes a pair of parallel disposed ribs one for co-action with a disc-like intermediate cap and one for co-action with the base member. In a preferred embodiment, the securing elements comprise one or more complementary chevron shaped wedge members positioned about a wall of said cap means and base means. <IMAGE>
