Abstract (en)
[origin: EP0528574A2] A low voltage electric cable connector especially intended for use outdoors, for example for garden lighting, comprising two connector parts (10, 12) which assemble into hinged relationship and snap fit together by relative pivotal movement about the hinge axis (34), the first part (10) incorporating spiked conductive elements (30) electrically connected within the part to a first electric cable (20), so that when the two parts are snap fitted together to sandwich and secure a second electric cable between them, the spikes of the conductive elements penetrate the insulation of the second electric cable electrically to connect the two electric cables together.
