Abstract (en)

[origin: EP0528725A1] The present invention relates to a mobile boxing ring obtained by conversion of a suitable trailer (1). The trailer comprises a chassis (2) and a body. The body has a floor (7), vertical uprights (8), a roof (9) and lateral walls (10) articulated on the edges of the roof (9). Foldable lateral panels (13a, 13b) are articulated on the longitudinal edges of the floor (7). In the transport position, the lateral panels (13a, 13b) are vertical inside the body (6) and the lateral walls (10) are folded and locked. In the representation position, the lateral walls are deployed outwards, the lateral panels (13a, 13b) are folded outwards and stabilised by adjustable feet (1). The corner posts (14) of the ring are fastened onto the lateral panels (13a and 13b). Ropes (15) connect the corner posts (14). The roof (9) can be raised. <IMAGE>
