Abstract (en)

[origin: JPH05193109A] PURPOSE: To improve a sheet gripper assembly for sheet rotary press to make the gripper hardly soiled and to act without thrust movement on closing. CONSTITUTION: A claw casing 8 is elastically tied with a fastening member 2 fixed on a claw shaft 6 via an elastomer 17. By omitting a free space for the spring member, ink, paper waste, and lacquer rest are made not to be deposited. Since the force to be used is extended proportionally to a distance, overload by materials is completely not generated.
